Restrictions for visits to health care facilities

**For patients or people accompanying a patient:**

If you have an appointment and feel completely healthy you are welcome to your appointment.

If you have a cold, a stomach illness or you are unsure about your health, contact your health care provider at least 24 hours in advance to advise whether to keep your appointment or re-schedule.

Companions may only enter if there is a **specific need** for it. Only **one person** is allowed to accompany a patient. This person must also be completely healthy.

**For visitors of in-patients:**

**No visits** are allowed – even if the visitor feels completely healthy.

If there are special reasons for the visit, the department should be contacted in advance to plan the visit with the staff. The responsible manager decides on eventual exceptions, based on the current situation in the department.

Thank you for your consideration and understanding!
